

Scala

Scala Aluminum step nose profile is used to prevent from getting abraded and slippery on the stairwells located in public areas. By being available in a wide range of of color and surface options, Scala step nose profile adds an aesthetic appeal while avoiding the erosion of flooring on the step nose.

The Scala Aluminum step nose profile provides a resistant structure that helps to avoid problems such as abrasion and getting slippery over time as they are mounted on various step structures easily and without any problems as they are available with different surface finishes. It gives a stylish appearance with different color choices that fits with the decoration of the area.
